

VISSUM

To whom it may concern,

This is to certify that Dr. Ahmed Galal was a post doctoral fellow at this Institution under my direct supervision as Medical Director of Vissum Corporacion Oftalmologica at that time during the period April 2001 to July 2004. His fellowship program ended on obtaining the doctorate degree and he continued to work in this institution until 2007.

During his fellowship program, which extended for 3 years, he received training in both medical ophthalmology and ocular surgeries which was directly with me and this training covered the following areas:

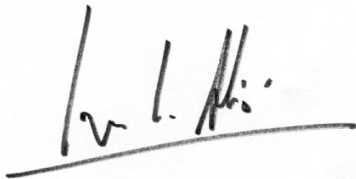

1. Oculoplasty and cosmetic surgeries
2. Anterior segment: cornea and Refractive surgery, glaucoma surgery and microincisional cataract surgery
3. Posterior Segment: vitreoretinal and macular surgeries

Dr. Ahmed Galal participated in these surgeries as first assistant surgeon, performing eventually himself part of the surgical procedures under direct supervision of the responsible surgeon.

He also participated in various scientific publications and investigational projects.

I strongly recommend him for any professional or academic position. He is a well-trained anterior and posterior segment surgeon. His ethical attitude with his colleagues and patients was outstandingly good and he was very esteemed by the patients he was operating or treating.

If you need any further information, please contact me under full confidentiality through my international executive assistant on jlalio@vissum.com

Professor Jorge L Alio MD, PhD, FEBO
